Check the radio button next to AbacusPCR Application and Click on Select button above it to set it as the default application for startup

At this point the AbacusPCR Login Application installation is complete.

Starting Application for first time

Restart the copier device at this time.

After starting up wait for a minute or two minutes for it initialize.

After Installation when the machine starts the first screens shows like below.

Enter AbacusPCR Admin Password. Default: 00000000 (8 Zero's) and press OK

AbacusPCR Admin Access
please enter admin password/pin to access administration information (touch field to enter text) Password
Cancel OK J

Enter Abacus Server IP address and leave the port default to 80.

AbacusPCR Admin Access				
please enter AbacusPCR server address and port information (touch field(s) to enter text)				
Server	10.0.0.203			
Port	80			
	CLS is Off Refresh			
S.No#:MPC01234	Cancel OK 🚽			

If the connection has not been established the below screen is displayed giving the user opportunity to change server information. Also check the firewall settings on the abacus server make sure HTTP Port 80 is not blocking.

Once the right information is entered. Click on Connect/Retry to reattempt connection to Abacus server.

Aba	int ACUS.	
	Administration	Connect/Retry

Depending on settings specified at the time of creating the device on the Abacus Manager the UI changes accordingly

Touch the right buttons to bring up lookup lists for the item. Touch the left button Labels to bring up virtual keyboard.

	Cancel Enter Comments Login ►

Optionally enter comments or login to the MFP from here.

Print Retrieval

AbacusPCR Print retrieval is a secure printing module for clients to save paper wastage and provide secure document retrieval.

Workflow: Users print to drivers configured for print retrieval. Such Jobs are saved in AbacusPCR repository. User can then walkup to any supported MFP device and release the prints to the device.

When the user logs in all the jobs belonging to the user are listed. One or more jobs can be chosen to be printed.

Select All: Select all documents

Delete: Delete Selected Documents

Print w/ Options: Print the selected documents with a different set of options

Print+Delete: Print the document and delete from list

Print: Print the job

Home: Go back to AbacusPCR Print Retrieval Home page in case of MEAP application or logout and go back to login page in case of AbacusPCR billing login application

Options like number of copies, duplex, color can be changed before printing.

Click on Print or Print w/ Options to start spooling the print file to MFP.

Abacus PCRE	Document Status
	Please wait while the selected documents are being printed.
	Print more documents 🗾 < Done

Contextual Login Mode

Contextual Login mode can be enabled from AbacusPCR Admin Access. When running under Contextual Login Mode, AbacusPCR authentication screen only comes up when the user clicks on Copy or Scan buttons.

Note: - The device needs to be restarted in order for the changes to take effect.

Verify Transactions

Verify user transactions by going into AbacusPCR Manager again. And click on Activity button on left side

The recent user activity should show up in the activities list.

Please contact AbacusPCR support if the transactions are not recording correctly.

Uninstalling AbacusPCR Application from Canon MEAP Device

Open browser and logon to sms site <u>http://<deviceip>:8000/sms</u> again Go to System Management > Enhanced Sys.App tab You should see AbacusPCR application with "Started" state.

Wh	en the login application is cha	inged and individu	al settings are incorrect, you may not be abl	e ta log in.		
				_	Select	Universit
	Name	Installed on	Application ID	Version	Status	Resources Used
c	AbacusLoginApplication	Sep 09/2008	11111111-2233-1111-2222-22222222222222	1.0.0.0	Started	File Space: 4096 KI Memory: 4096 KI Threads: 33

In order to remove the AbacusPCR application it has to be stopped. To do that select radio button next to Default Authentiation and Click on Select button

abo	ve.							
							File Descriptor:	14
	o	Default Authentication	Sep/03/2008	e7654b49-3e65-4cd5-9d29-c4a5a436061a	1.0.0	Installed	File Space: Memory: Threads: Sockets: File Descriptor:	40 KB 450 KB 1 0 1

This will set the AbacusPCR application to stop mode and Default Authentication to start mode.

Restart the device and log on to "sms" again

Now AbacusPCR application can be uninstalled
